# Introduction

Since its founding in 2013, Bedrock Group has grown from an ambitious construction business into a multidisciplinary contractor delivering complex projects across Southern Africa. Led by brothers Greg and David Kitching, who bring more than 30 years of combined experience in engineering, construction and project delivery, the company has steadily expanded its capabilities, expertise and geographic reach while remaining grounded in the practical values on which it was built.

Over the past decade, Bedrock has evolved alongside the industries it serves. What began as a focused construction operation has developed into a business with extensive experience across Building, Civil Infrastructure and Industrial Infrastructure, supported by specialised construction methodologies, lifting capabilities and a highly skilled team. Through continuous investment in people, equipment and systems, the company has established a reputation for taking on technically demanding projects and delivering them with professionalism, adaptability and precision.

At the heart of Bedrock's success is its people. Many members of the team have grown with the business over the years, contributing to a culture built on accountability, collaboration and a shared commitment to excellence. This combination of experience, technical knowledge and long-term relationships enables Bedrock to consistently deliver practical solutions to complex construction challenges throughout the region.

# Operating Across Africa

With a growing footprint across Southern Africa, Bedrock Group has built a reputation for delivering complex construction projects in diverse and often challenging environments. While proudly South African, the company has successfully completed projects in Mozambique and other neighbouring countries, contributing to the development of civil infrastructure, industrial facilities and strategic construction projects throughout the region.

This expanding presence reflects Bedrock's ability to adapt to varying project requirements, logistical challenges and operating conditions while maintaining the highest standards of quality, safety and execution. Through flexible construction methodologies, strong partnerships and proven technical expertise, Bedrock continues to support the growth and development of Africa's built environment.

## → Vision

To be Africa's most trusted partner in Building, Civil Infrastructure and Industrial Infrastructure, recognised for innovation, technical excellence and the successful delivery of complex projects that shape the built environment.

## → Mission

To deliver innovative, adaptable and high-quality construction solutions through engineering expertise, operational excellence and a commitment to safety, creating lasting value for our clients and contributing to Africa's built environment.

# Our Sectors

- BUILDING
- CIVIL INFRASTRUCTURE
- INDUSTRIAL INFRASTRUCTURE
- PLANT & EQUIPMENT

# Our Capabilities

- PRECAST CONCRETE
- PRESTRESSING & TENSIONING
- TILT-UP CONSTRUCTION
- HEAVY LIFTING
- RIGGING
- STRUCTURAL INSTALLATION
- EQUIPMENT HIRE
- PROJECT DELIVERY

# Building

Within the Building sector, Bedrock delivers complete structural building solutions across residential, commercial and mixed-use developments. Projects are executed using a combination of precast, site-cast and tilt-up construction methodologies, selected to suit the specific requirements of each development.

Bedrock focuses on the delivery of structural systems and complete building structures, where construction methodology, programme requirements, logistics and installation sequencing play a critical role in successful project execution.

## Building Types

- Multistorey Residential
- Commercial Buildings
- Mixed-Use Developments
- Logistics Facilities
- Industrial Buildings
- Specialised Structures

## FEATURED PROJECTS

# Infrastructure

Within the Civil Infrastructure sector, Bedrock delivers structural solutions that support transportation networks, public infrastructure and regional development. The company's involvement includes the manufacture, prestressing, tensioning, transport and installation of large structural elements used in roads, bridges, rail, marine and port infrastructure projects.

Operating in technically demanding environments, Bedrock's role is often centred on complex structural components where engineering requirements, construction methodology, logistics and installation sequencing are critical to successful project execution.

## Infrastructure Types

- Roads & Highways
- Bridges
- Rail Infrastructure
- Marine Structures
- Ports & Harbours
- Culverts & Drainage Structures

## FEATURED PROJECTS

# Industrial Infrastructure

Bedrock delivers structural solutions that support manufacturing, logistics, warehousing, mining and specialised industrial operations. The company's involvement includes the manufacture, transport and installation of structural concrete elements, tilt-up construction and the delivery of complete structural systems for large-scale industrial facilities.

Industrial projects often require the coordination of complex structural components, construction methodologies and installation programmes within active operational environments. Bedrock's role is focused on delivering structural solutions that meet the operational, logistical and performance requirements of these facilities.

## Industrial Applications

- Warehousing & Distribution Facilities
- Mining Infrastructure
- Logistics Infrastructure
- Processing Facilities
- Fire-Rated Facilities
- Specialised Industrial Structures

## FEATURED PROJECTS

# Plant & Equipment

Bedrock provides specialised plant, lifting equipment and transport resources to support construction, infrastructure and industrial projects. These capabilities support both Bedrock projects and external client requirements, enabling the safe and efficient movement, lifting and installation of structural elements across a wide range of operating environments. Plant and equipment services are based in Durban and are available to external clients throughout KwaZulu-Natal and surrounding regions.

The company's fleet includes cranes, crane trucks, cherry pickers, straddle carriers, transport vehicles and specialised equipment utilised in construction, infrastructure and industrial applications. Combined with experienced operators and lifting personnel, these resources play a critical role in the successful execution of complex lifting, transport and installation operations.

## Hire & Lifting Services

- Crane Hire
- Crane Truck Hire
- Cherry Picker Hire
- Straddle Carrier Hire
- Specialised Lifting Solutions
- Experienced Site Teams
- Transport & Logistics Support

## → Challenge

Aging bridges and growing traffic volumes on the N3 corridor posed a serious threat to logistics, safety, and commerce in KZN. The realignment and widening projects demanded fast execution, technical expertise, and seamless coordination between multiple public and private entities.

## → Solution

Bedrock engineered and executed the transport and installation of massive precast bridge beams across multiple structures within the N3 upgrade programme, including Lancaster Bridge, Langford Bridge, Paradise Valley Bridge and the Pavilion Interchange. Using specialised equipment such as a 200-ton capacity dolly and multi-axle hydraulic trailers, the company successfully managed the movement and installation of large structural elements in a highly constrained operating environment.

The process required close collaboration with:

- SANRAL
- KZN Department of Transport
- Metro Police
- RTI

All major beam transport and installation activities were executed during carefully planned night-time operations to minimise disruption to the travelling public while maintaining programme requirements.

## → Results

- 24 U-beams supplied and installed across Langford Road Bridge and Lancaster Road Bridge
- 153 I-beams supplied for Paradise Valley Viaduct and Westville Viaduct
- Successful delivery of bridge beam packages across four major structures within the N3 upgrade programme
- Demonstrated Bedrock's capability in large-scale precast manufacture, transport and installation for critical transportation infrastructure

# Client Testimonials

**Sean Russell**  
Engineer  
BVN Consulting  
Engineers (Pty) Ltd

"I received the as-built survey yesterday of buildings F and G from the land survey and I would like to say thank you for a job well done. The positioning of these two buildings are literally spot on and the buildings are uniform as well. Thank you."

---

**Marek Jansen**  
Reed Simpson  
Construction (Pty) Ltd

"Service has been great thanks... no issues! It was a pleasure working with you and I will recommend Bedrock and your system on future projects. Awesome, good service, good product... gets rewarded!"

---

**William Smith**  
PR Engineer  
Bosch Projects

"Bosch Projects and Sumitomo agree with you. The feedback we received from the client was that the Japanese delegates from head office were very impressed at their last visit."

---

**Craig Bruton**  
Director  
Abbeydale

"Just taking this opportunity to thank Bedrock for the works you performed at Toyota SA. Your precast mezzanine concept was a game-changer, and whilst we had some bumpy road moments, still somehow managed to push this project over the line. I recently looked back at my photo archive, in disbelief actually... the construction team covered an incredible amount of work with incredible speed. Well done for your efforts and the major part you played in this process. Please extend gratitude to all your staff involved."

# Company Culture

At Bedrock, our culture has been built around people, relationships and shared purpose. From the beginning, the company has placed a strong emphasis on investing in its team through skills development, training opportunities and an environment where individuals are encouraged to grow alongside the business. Whether on site, in the yard or in the office, collaboration, accountability and mutual respect remain central to the way we work.

This people-first approach extends beyond our projects and into the communities in which we operate. Over the years, Bedrock has supported a variety of sporting events, charity initiatives and community upliftment programmes, reflecting the company's belief in making a positive contribution both within and beyond the construction industry.

Technical excellence and safety are fundamental to our success, but it is the strength of our people, relationships and shared commitment that continues to drive Bedrock forward.

# History

Each year brings new challenges and achievements. Here, we highlight key milestones that reflect our commitment to delivering quality, innovation, and excellence throughout our history.

• 2013 •

Bedrock was founded on hopes, ambition and a vision for innovative construction.

• 2015 •

Investment in large-scale construction assets and operational capability.

• 2018 •

Delivery of the company's first major Industrial Infrastructure project.

• 2019 •

Expansion beyond South Africa with the commencement of operations in Mozambique.

• 2021 •

Delivery of major marine and port infrastructure projects.

• 2023 •

Celebrated 10 years of construction excellence

• 2024 •

Ground breaking at Cato Ridge Tensioning Facility.

• 2025 •

Investment in company structure, systems and long-term growth.

• TODAY •

Delivering Building, Civil Infrastructure and Industrial Infrastructure projects across Southern Africa.
